

NetShelter CX Remote Management

Manage your branch office IT environment from anywhere.

APC Network Management Cards allow users to remotely monitor and manage IT environments. Integrating a Network Management Card and APC Smart-UPS into a Netshelter CX solution allows the ultimate level of environmental monitoring, power control and energy management.

APC Smart-UPS with Network Management Card installed. P/N : SMX1500RM2UNC

Ultimate Remote Management for branch IT equipment

- Remote environmental monitoring for inside and outside of the enclosure
- Remote controllable outlet groups
- Email/SMS notifications for user settable thresholds and actions
- Programmable automated actions
- Server shutdown using PowerChute Network Shutdown
- Integration to APC StruxureWare Central management platform
- Easily installed on delivery
- One network connection for full environmental and energy management

APC Network Management Card

The screenshot displays the 'Universal I/O' web interface. It features a navigation menu at the top with 'Home', 'UPS', 'Environment', 'Logs', and 'Administration'. The main content area is titled 'Overview' and 'Temp & Humidity'. It shows a table for 'Temperature & Humidity' with columns for Name, Alarm Status, Temperature, and Humidity. Below this is a 'Recent Environmental Events' table with columns for Date, Time, and Event. The interface also includes a 'No Alarms' indicator and an 'APC' logo at the bottom right.

Name	Alarm Status	Temperature	Humidity
Outside Air Temp	Normal	71° F	44% RH
Inside Rear Air Temp	Normal	87° F	23% RH

Date	Time	Event
06/27/2011	10:10:07	Environment: Restored the local network management interface-to-integrated Environmental Monitor (Universal I/O at Port 2) communication.
06/23/2011	06:53:22	Environment: Restored the local network management interface-to-integrated Environmental Monitor (Universal I/O at Port 1) communication.
06/01/2011	10:29:04	Environment: Restored the local network management interface-to-integrated Environmental Monitor (Universal I/O at Port 1) communication.
05/20/2011	16:45:20	Environment: Restored the local network management interface-to-integrated Environmental Monitor (Universal I/O at Port 1) communication.
05/01/2011	19:52:03	Environment: Restored the local network management interface-to-integrated Environmental Monitor (Universal I/O at Port 1) communication.

Easy to use management interface

APC Network Management Cards offer web-based user access and control functionality. By assigning one IP address to one device, you can monitor and manage everything that is happening in your remote IT environment.
